Microfibre Cloths: Ultra33+, Ultra88, Ultra121

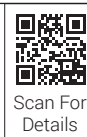

HIGHLY ABSORBENT MULTIPURPOSE CLOTHS

Microfibre cloths clean better than conventional materials like cotton or wool. Microfibre is made up of polyester and polyamide fiber blends that are split to 1/100th the size of a human hair. This gives it a much larger cleaning surface area, making it more effective. Microfibre cloths absorb liquids better and can pick up dry dust using electrostatic attraction.

Ultra33+ Super Pearl Microfibre Cloth

- Cost effective
- Available in 4 colours to colour code for different uses
- Can be used on multiple surfaces like table tops, toilets, etc
- Super absorbent
